IDENTIFIERS	*California

ABSTRACT

Statistical and directory information for California are provided in one volume. The 1974-75 statistics cover library systems, public libraries in five population ranges, bookmobiles, academic libraries, special libraries, state agency and institution libraries, and county law libraries. Public library statistics for 1973-74 also are included. The data covers income, expenditures, personnel, and materials. For 1974-75 there also is data on collections, circulation, reference services, and interlibrary loans. The first of the three directory sections lists all types of libraries alphabetically by city or unincorporated area. Information includes library name, type, address, telephone number, interlibrary loan (ILL) phone number, TWX and Telex numbers, directory's name, schedule of hours, clientele and population, system or network affiliation, and branch libraries. The second section lists library systems and includes address, membership, and persons to contact. The third section is a chart of public libraries by name, with system, TWX or Telex number, ILL phone number, headquarters phone number, and chief librarian. An index for special subject collections in California libraries and a library name index are included. (LS)

237 Library Name Index

Introduction

Library statistics and directory information for California is published in a new form for 1976. This volume is compiled from annual reports submitted by public, academic, special and state agency and institution libraries, and by Public Library Services Act Systems. It replaces the "winter" statistical issue of *News Notes of California Libraries. News Notes* continues as the official journal of the California State Library, but no longer carries the annual report data. No directory was published in 1975. The last to appear was *News Notes*, vol. 69, no. 1, "winter" 1974.

Users of the statistics publication will find much familiar material in this volume, and much that is new this year. There are tables of public library population and finances, staffing, collections and activities, and also tables of academic libraries, of special libraries, of state agency and institution libraries, and of county law libraries.

There is a Directory section arranged by city, providing name, address, library director and other data for reporting libraries. There is an address list of all public libraries, and one of PLSA Library Systems, networks and reference centers. There is a subject index to the special collections of all reporting libraries. There is a name index for locating libraries on the statistics tables, and in the Directory.

A supplement to this volume contains public library statistics tables for fiscal year 1973–74, not previously published.

For fiscal year 1974–75 we have data for 1,037 California libraries, including:

177 public libraries with 2,869 outlets.

181 academic libraries, (104 college or university; 77 community or junior college).

15 popular libraries at armed forces installations.

86 law libraries, (58 county law libraries; 28 academic, private or governmental law libraries).

16 resident libraries at state institutions.

101 medical libraries.

5 religious libraries.

221 special libraries.

California Library Statistics and Directory 1976 is distributed through the Library Depository Act, and to libraries on the exchange list of the California State Library. It is sent to all California libraries that participated in the collection of data through completion of the annual report forms. Larger libraries receive multiple copies, according to the size of the population they serve.

For the first time this year, the publication is also being made available for sale through the Publications Sales Section, California State Department of Education. Price and order information may be found on the verso of the title page.

Information in this 1976 volume was compiled and typed by Gail Kelly, Jean Kushida and Diana Orsolini. The supplemental public library tables covering fiscal year 1973–74 were first assembled for computer entry by Kathy Olson and Alex Vuckovich, then reconstructed from the faulty print-out by Shirley Thomas.

FIVE YEAR STATISTICAL SUMMARY. FISCAL YEARS 1970–71 TO 1974–75

Entries are totals and per capita computations.

Fiscal year. State population. Type of library.	Operating Expenditure			Total library staff, FTE	Book stock, total volumes	Total circulation, all materials	Interlibrary Loan		Total reference transactions
	Personal services	Library materials	Total				Volumes lent	Volumes borrowed

Public Library Services Act Systems

A table compiled from Public Library Services Act (PLSA) System annual reports is published for the first time this year. Five single jurisdiction Systems and 16 Cooperative Library Systems are represented. Record keeping is not totally uniform among Systems, nor even among cooperating libraries within a single System in some cases, so comparisons between Systems on the basis of data printed here is not always appropriate. Data is published as reported by the Systems, and has not been verified by the State Library. In 1975, the Camino Real Library System merged with the Santa Clara Valley Library System to form the South Bay Cooperative Library System. California's Public Library Systems are thus reduced in number by one, for a total this year of 20.

PUBLIC LIBRARY SERVICES ACT SYSTEMS. FISCAL YEAR 1974–1975

Public Libraries

California's public libraries are arranged in five size groupings on the tables that follow: 40 libraries serving a population of over 100,000; 37 libraries serving 50,000 to 100,000 population; 36 libraries serving 25,000 to 50,000 population; 39 libraries serving 10,000 to 25,000 population; and 19 libraries serving less than 10,000 population. Data is provided for 171 of our 177 public libraries; the remaining six either are operated under contract by another library and do not maintain separate statistics, or failed to complete the annual report forms.

The size groupings are numbered from 1 to 5, in descending order of population, and public libraries are identified with this number in the Library Name Index at the back of this volume. Thus, "Alameda Public Library (2)" indicates that statistics for that library will be found on the second group of tables, libraries serving 50,000 to 100,000 population.

For each of the five size groupings tables are provided showing fiscal year 1974–75 data for: population, income and expenditure; positions and salaries; collections; and activities. A final table shows estimated income and expenditure data for fiscal year 1975–76.

In the column headings, the subscript numbers, (B1, C13, etc.), refer to numbered lines on the Public Library Annual Report form, allowing libraries to identify on the table a particular item reported.

Two significant changes from compilation in previous years should be noted. Population (B1) is for January 1, 1975, the middle of the fiscal year for which data is reported, as estimated by the Population Research Unit, California State Department of Finance. Previous years' tables showed a population figure as published July 1 of the preceding year, and was therefore a figure one year behind the fiscal year for which library data were published.

Also, this year an Equivalent Operating Expenditure (B44) is reported for the first time. This item is the sum of the library's operating expenditure plus the equivalent amount of any operating services or supplies benefiting the library but provided by another division of the jurisdiction and not charged to the library. Examples are personnel fringe benefit contribution, insurance, or maintenance. Since some libraries report such items as part of their operating budget and some do not, the creating of an Equivalent Operating Expenditure allows more exact comparison of one public library with another. Equivalent Expenditure Per Capita (B45) is based upon this Equivalent Operating Expenditure.

* Total figure for all vehicles operated by this library.

Academic Libraries

Two tables of data from academic libraries for fiscal year 1974–75 are published: Staffing and Expenditure, and Collections and Activities. The data is published as reported on the Academic Library Report form, and has not been verified by the State Library.

The short form name of library, also used on the Subject Index to Special Collections, is identified in the Library Name Index and is also listed in the Directory entry for the library.

In the column headings, the subscript numbers, (H12, etc.), refer to numbered lines on the Academic Library Report form, allowing libraries to identify on the table a particular item reported.

ACADEMIC LIBRARIES. STAFFING AND EXPENDITURE, FY 1974–1975

Special Libraries

A table of data for special libraries for fiscal year 1974–75 is published this year. The data is published as reported on the Special Library Report form, and has not been verified by the State Library.

The short form name of library, also used on the Subject Index to Special Collections, is identified in the Library Name Index and is also listed in the Directory entry for the library. Libraries are coded by type, according to a system adapted from that of the *American Library Directory.*

A – Armed forces popular library.
L – Law library.
M – Medical library.
PB – Public library branch.
R – Religious library.
S – Special library.

In the column headings, the subscript numbers, ("18", etc.), refer to numbered lines on the Special Library Report form, allowing libraries to identify on the table a particular item reported.

State Agency and Institution Libraries

A table of data for fiscal year 1974–75 is published for those California State Agency and Institution libraries that reported data. It is published as reported on the Special Library Report form, and has not been verified by the State Library.

The short form name of library, also used on the Subject Index to Special Collections, is identified in the Library Name Index and is also listed in the Directory entry for the library. Libraries are coded by type, according to a system adapted from that of the *American Library Directory.*

I – Institutional resident library.
L – Law library.
M – Medical library.
S – Special library.

In the column headings, the subscript numbers, ("18", etc.), refer to numbered lines on the Special Library Report form, allowing libraries to identify on the table a particular item reported.

County Law Libraries

Law libraries are operated by all of California's 58 counties. Only those libraries listed reported data for fiscal year 1974–75. The data is published as reported on the County Law Library Report form, and has not been verified by the State Library.

In the column headings, the subscript numbers, ("18", etc.), refer to numbered lines on the County Law Library Report form, allowing libraries to identify on the table a particular item reported. This table was prepared with the assistance of Muriel Hoppes, State Library Law Librarian.

Directory of California Libraries

Information in this Directory is based on data provided by the libraries themselves in their annual reports for fiscal year 1974–75. Wherever possible, information has been updated to final copy deadline, May, 1976. Entries have been created for a few major libraries which did not report this year, but are known to be still in operation. Such libraries do not appear in the statistics tables.

Libraries are coded by type, both in Directory listings and in statistics tables, according to a system adapted from that of the *American Library Directory.*

- A – Armed forces popular library.
- C – College or university library.
- I – Institutional resident library.
- J – Junior college or community college library.
- L – Law library.
- M – Medical library.
- P – Public library, subdivided:
  - PB – Branch public library.
  - PC – County public library.
  - PH – High School district public library.
  - PL – Library district public library.
  - PM – Municipal public library.
- R – Religious library.
- S – Special library.

Directory listings are alphabetical by city or unincorporated area. Within a city, they are alphabetical by name of library, or name of organization operating library.

Elements of a library listing are as follows.

First section. Library name; library type code; street address; (mailing address in parentheses, if different); ZIP code. Headquarters telephone number. Interlibrary loan telephone number. TWX or Telex number.

Second section. Library director's name.

Third section. Schedule of main library hours open. Number of hours open per week. For public libraries, total hours all units open per week; for special libraries, whether library is or is not open to public, ("Yes" or "No").

Fourth section. Library clientele: for public libraries, population taxed for service and area served in square miles; for academic libraries, student body and faculty served, and number of divisions of the academic year; for special libraries, number of persons served and statement of interlibrary loan restrictions; for county law libraries, number of attorneys practicing in the county. For branch libraries and for county law libraries, number of volumes held and staffing in full-time equivalent is also given.

Fifth section. Public library service units: headquarters, if open to public; number of branches; number of stations; number of bookmobile stops; total service outlets.

Sixth section. For public libraries, listing of membership in PLSA Library System.

Seventh section. Listing of membership in library network, consortium or other library services grouping.

Eighth section. For special and county law libraries, name and location of branch libraries.

Supplement: Public Libraries, Fiscal Year 1973–74

Fiscal year 1973–74 tables for public libraries that would have appeared in the 1975 statistical publication, never issued, are published now as a supplement to this volume. Originally intended to be compiled by computer, the tables as printed out were not usable and were reconstructed by hand. Data for branch libraries (marked *) are included in the entries for the headquarters libraries, and are not repeated in the totals.

TABLE D-1 PUBLIC LIBRARIES POPULATION, INCOME AND EXPENDITURES, 1973–74 Over 100,000 Population

Item no.	Library	Population of area taxed for library support*	Assessed valuation as of 9/1/73	Tax rate per $100		Income			Total expenditures	Capital expenses

Subject Index to Special Collections in California Libraries

This year's annual report forms completed by academic, public, special and state agency libraries asked for a listing of special subject collections, in Library of Congress subject heading terms, for use in a subject index.

Not all libraries replied, and many that did said they could not use Library of Congress terms for their subjects. Most public libraries indicated they had "Local history collections".

In setting up this index we have had to do considerable editorial revision of the terms, but the index is a long way from perfect. Where the meaning seemed clear, we have converted a library's term into an LC subject heading. Where it was not clear we have left the library's term as reported. Local history collections have not been listed under "L", but city, county or regional names have been supplied.

Almost all libraries listed a "California—History" or a "Californiana" collection. Only the known major collections have been listed. For other subjects the index is not evaluative: both large and small collections are listed together, as reported by the libraries.

Library names are given in the standard short form also used for listings in the statistical tables. The key to this short form is the Library Name Index, which also directs the reader to the full Directory listing for the library, by city.

Library Name Index

All entries in the Directory of California Libraries are indexed here, with indication of the name of the city or unincorporated area in which the entry for the library will be found.

Public library entries include a postscript number in parentheses, (1) to (5), identifying the size of population served by the library and the set of public library statistics tables in which data for that library will be found, as follows: (1) over 100,000 population; (2) 50,000 to 100,000 population; (3) 25,000 to 50,000 population; (4) 10,000 to 25,000 population; (5) under 10,000 population.

Academic, special and state agency libraries are entered by the short form names used for those libraries on statistical tables and on the Subject Index to Special Collections. The Library Name Index thus serves as a key to short form names. These short form names are alphabetized letter by letter, not as if spelled out in full.

Branches of county public libraries are indexed under the name of the branch, followed by the name of the county library of which the branch is a part, and the city or area in which it is located.
